Handbook checkpoints added: approved POS, committee, reading list, written/oral prelim, Form 10, retake window

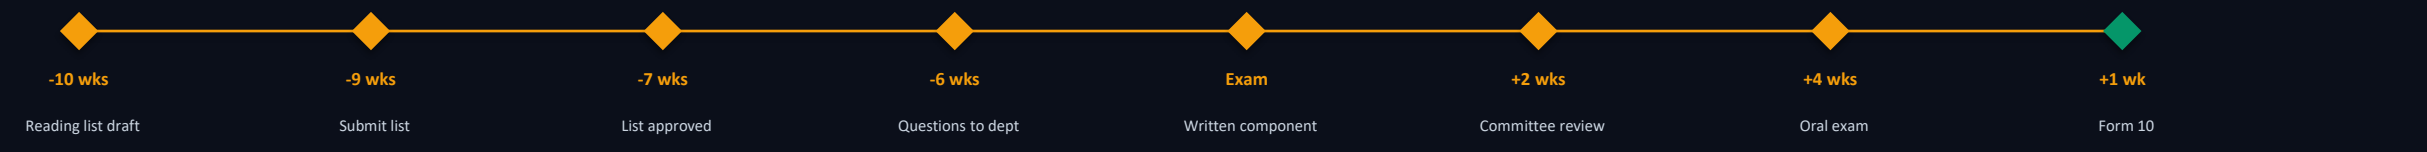

PRELIMINARY EXAM HANDBOOK TIMELINE

Fall 2027 target with relative deadlines from the approved Polytechnic handbook

1. Eligibility Gates	2. Reading List	3. Written Component	4. Oral + Result
- Approved Plan of Study.	- Meet advisor on topic and timeline.	- Questions finalized from approved list.	- Committee reviews written work within 2 weeks.
- Good standing: 3.0+ GPA.	- Develop topic-linked list at least 10 weeks out.	- Chair sends questions for department review.	- Written result sent within 1 week.
- No unresolved core grade below B-.	- Submit to committee exactly 9 weeks out.	- Complete written responses within 6 weeks.	- If approved, oral exam scheduled within 2 weeks.
- Required courses complete or in progress.	- Committee reviews/revises within 2 weeks.	- Submit responses immediately on completion.	- If both approved, Chair submits electronic Form 10.
- Committee: 3+ graduate faculty; majority regular.			

Fall 2027 dependency chain for the Gantt milestone

Pass Path	Retake Rule	Defense Guardrail
Written and oral components must both be Approved in the same administration.	If Not Approved, the second prelim should be completed by Spring 2028; summer does not count as the next immediate semester.	Final defense in Fall 2029 leaves far more than two registration sessions after the Fall 2027 prelim.

KEY MILESTONES: REQUIREMENTS, DEPENDENCIES, OUTPUTS

AUG 2027 - POS + COURSEWORK AUDIT	
Requirement	Approved POS, committee plan, GPA/core-grade review, and final prelim-semester course plan locked.
Why placed here	Confirms handbook eligibility before the reading-list clock starts.
FALL 2027 - PRELIMINARY EXAM	
Requirement	Reading list approved; written response completed; oral component passed; Chair submits electronic Form 10.
Why placed here	Moves the plan from coursework-heavy preparation into proposal development.
SPRING 2028 - RETAKE WINDOW IF NEEDED	
Requirement	Second prelim only if written or oral component is Not Approved in Fall 2027.
Why placed here	Handbook requires the second administration by the next immediate semester; summer does not apply.
FALL 2028 - PROPOSAL DEFENSE	
Requirement	Finalize research design, methods, data plan, committee feedback, and IRB/data protocol if applicable.
Why placed here	Creates a clean handoff into Spring-Summer 2029 data collection and analysis.
FALL 2029 - FINAL DEFENSE + ETD	
Requirement	Complete dissertation, defend, address revisions, submit ETD, and clear graduation requirements.
Why placed here	Final milestone stays at the end and satisfies the post-prelim registration-session spacing rule.

COURSE INVENTORY & CREDIT BREAKDOWN

Coursework is front-loaded so the Fall 2027 prelim has the handbook prerequisites in place.

TRANSFER - GSU MS (21 cr)
CIS 8005 Data Programming (3cr)
CIS 8398 Advanced AI for Business (3cr)
CIS 8695 Big Data Analytics (3cr)
CIS 8795 Big Data Infrastructure (3cr)
CIS 8080 IS Security & Privacy (3cr)
CIS 8045 Unstructured Data Management (3cr)
CIS 8690 Topics in Information Systems (3cr)
SPRING 2026 - Current (10 cr)
TECH 60300 Graduate Seminar - Planning (1cr)
STAT 52000 Time Series & Applications (3cr)
CS 59300 Computer Vision (3cr)
ECE 59500 Selected Topics in ECE (3cr)
FALL 2026 - Core / Methods (10 cr)
MET 52700 Technology: Global Perspective (3cr)
STAT 50100 Experimental Statistics I (3cr)
TECH 60100 Research Seminar in Technology (1cr)
TECH 64600 Analysis of Research in Industry (3cr)

SPRING 2027 - Advanced Methods (9 cr)
TECH 67600 Analysis of Research Methods (3cr)
CS 57800 Statistical Machine Learning (3cr)
CS 52000 Computational Optimization (3cr)
SUMMER 2027 - Final Prep Load (6 cr)
STAT 51400 Design of Experiments (3cr)
CS 58000 Algorithm Design & Analysis (3cr)
Reading-list drafting and committee/POS audit
FALL 2027 - Final Coursework + Prelim (6 cr)
STAT 52400 Applied Multivariate Analysis (3cr)
ECE 57000 Artificial Intelligence (3cr)
GRAD 68900 CSE Seminar (0cr)
Written prelim, oral prelim, Form 10
SPRING 2028 - FALL 2029 - Research Completion
Sp'28: proposal writing; retake window only if needed
Su'28-Fa'28: proposal completion and defense
Sp'29-Su'29: data collection and analysis
Fa'29: dissertation writing, final defense, ETD

Credit summary: 21 transfer + 41 Purdue coursework + 41 dissertation/research credits = 103 credits listed | Target graduation: Fall 2029

RESEARCH PHASES, CONTROLS, AND IDP ALIGNMENT

PHASE 1: FOUNDATION

Sp'26 - Sp'27

- Literature review and research problem framing.
- Advisor meetings; first publication idea.
- Build technical base in ML, CV, statistics, optimization.

PHASE 2: QUALIFICATION

Su'27 - Fa'27

- POS/course audit, committee, reading list, written/oral prelim.
- Synthesis-focused study, not memorization-only review.
- Spring 2028 retake window exists only as contingency.

PHASE 3: PROPOSAL

Sp'28 - Fa'28

- Proposal writing, methodology, data protocol, committee feedback.
- IRB or data permissions if required by final design.
- Proposal defense in Fall 2028.

PHASE 4: COMPLETION

Sp'29 - Fa'29

- Data collection and analysis in Spring-Summer 2029.
- Dissertation writing and revisions through Fall 2029.
- Final defense, ETD submission, graduation clearance.

Controls added in Version 4

- Prelim is expanded into a checklist-driven workflow, not a single date.
- Retake contingency is visible but separated from the main success path.
- Research-only semesters are explicit: Sp'29, Su'29, and Fa'29.
- Final defense remains the terminal milestone with ETD/graduation clearance.
